

Bundle the best:

When you choose Zebra’s market leading healthcare scanners for your medical solutions, your healthcare customers get the dependably fast and accurate barcode capture they need to best protect patient safety.

An unmatched portfolio of form factors with all the right features

Zebra scanners are purpose-built for healthcare, designed with features that optimize clinician workflows and improve patient experiences. Our unmatched healthcare scanner portfolio is the ideal complement for your medical solutions, providing the highly reliable, fast and accurate scanning that is required in healthcare to ensure a high quality of care and patient safety. Whether you need standardized or customized solutions, the team of experts in Zebra’s Global OEM division is ready to help you seamlessly integrate our handheld, presentation or pocketable scanners into your solutions. And you get a set of features that puts Zebra’s healthcare scanners in a class of their own, including*:

- Disinfectant-ready housings
- Point and shoot simplicity to capture virtually any barcode
- Easy capture of the most challenging barcodes and healthcare-specific symbologies
- Instant switching between two apps
- Battery power options

Zebra DNA in every scanner — powerful software that gives your medical solutions a real advantage

Zebra DNA™ is your scanner advantage, with Zebra-only tools that enable constant visibility into device performance, deliver optimal device uptime and provide the flexibility to adapt to and streamline workflows. For example, with Blood Bag Parse+ and UDI Scan+, just one trigger pull captures barcode data, parses and transmits the data required in the right order to the right fields. In addition, Virtual Tether keeps track of cordless scanners, preventing lost and misplaced devices — and the resulting workflow disruptions. For information on all Zebra DNA software tools for scanners, please visit [this link](#)

And you can earn rebates when you trade in eligible legacy devices with our Trade Up Program and purchase Zebra’s best-in-class scanners.
